Sprint Review 4

- Features Implemented
  - o Added search feature to find recipes
  - o Created main/feed page
- Issues fixed
  - o NA
- Implementation review:
  - o The members discussed the search feature. The members decided that a user should be able to search by ingredients, name, and description. A search feature was created.
- Changes Made
  - o Updated html of pages
- Plans for next sprint
  - o Three members will be focusing on creating a front-end design and continue working on front end design.
  - o Two members will work on the back end, implementing the html templates in the app.
- Scrum Review
  - o All dev members showed their work and the product owner and scrum master took part in the discussion to decide if everything was up to par. The members discussed focus group feedback.
